What is a Labdoo Hub?

Labdoo is a grassroots project that aims at solving the digital divide problem through the participation of as many people as possible, each of us taking on a small mission. While anyone can participate at any level, Labdoo hubs are locations in the planet where volunteers gather and carry out one or more Labdoo tasks. Hubs can take on many different tasks, such as collecting and tagging laptops, sanitizing them, organizing dootrips, deploying laptops in local schools, recycling, outreaching to your community, etc.

If you and your friends want to take an active role in the fight against the digital divide, now you have the tools to do so. Create your own Labdoo hub and help bring the hope of education to every child in the planet.
Hub Activities

As a hub you can choose to do any of the following activities. A best practice is to start with one or two activities, and then progressively increase as you gain experience. In any case, you decide which activities you can carry out depending on your resources.

1. **Collect and tag laptops** - Collect unused laptops from your local community and maintain your own laptop inventory.
2. **Quality Assurance** - Sanitize laptops, install Ubuntu + education software, build magic boxes.
3. **Outreach your community** - Let people know about the digital divide and eWaste problems, mobilize people to help the Labdoo cause.
4. **Recycle Laptops** - Recycle laptops that no longer work and help reduce eWaste.
5. **Global Events** - Set up your own global events such as QA Global parties, where volunteers from around the globe meet to fix and sanitize laptops.
6. **Dootrips** - Organize your own dootrips by mobilizing travellers in your own area.
7. **Deployment** - Identify schools that need laptops and set up new edoo village projects with them.

As a hub you can choose to do any of the following activities. A best practice is to start with one or two activities, and then progressively increase as you gain experience. In any case, you decide which activities you can carry out depending on your resources.
