Clean Water & Education Project (CWEP)

Krous village, Swaydankum commune,
Siem Reap district, Siem Reap town/province,
Kingdom of Cambodia, (855)

Dear Mr. Jordi

I am writing you on behalf of Clean Water & Education Project (CWEP). Each year the “**Clean Water & Education Project (CWEP)**” continues to advance the cause of Health and Education. Through our programs Clean Water & Education, we have seen many lives and activities changed for the better.

Let me share with you the story of SRET secondary school that your Labdoo Organization helped with the 12 laptops in year 2011. Fortunately, we were there in time to help. Now the students of SRET school are very enjoyable and advance in using the technology (computer).

The CWEP continues to work to help make a difference in educate students on technology program like the SRET school. Each and every schools effected by this lacking the technology training has reason to hope because great advances are being made in developing the education on technology in Cambodia.

As you know most of the employment are required the computer skill. However, continued outreach is essential to help the over hundred thousand of students after school who are effected by computer skill to get a better job in the future. Today, you could make an immediate difference in the life of those students. The 25 computers/laptops being sent would be fit enough to the numbers of 1420 students. We would greatly appreciate the donations of computers/laptops from your Labdoo Organization for Banteay Srey high school in Siem Reap-Angkor, Cambodia. At bellow is the project description sheet. Please kindly continue take some moment to find the project sheet bellow.

Thank you for considering our request. If you have any questions or need further information, please feel free to contact me at your convenient.

Sincerely,

Mr. Chantrea CHHUON

CWEP Coordinator
