

Dear Dr. Lange, Dear Labdoo
Greetings in the name of the Lord.

In addition to our application, we would like to provide you with further information about our training centres.

Furthermore, we assure, as required by Labdoo, that the laptops are permanently installed in the computer rooms and are not used for other applications. In addition, we have 4 teachers with the necessary IT knowledge.

We are very happy that with these laptops we can teach children IT skills, which would not be possible without these laptops due to their poverty. Like Labdoo, we are a non-profit organisation and do not charge any fees.

Our 'Happy Children's Center' was established in 2010 and is located in the slum area of Colombo, District 15, Mattakkoullia in Sri Lanka. We started an education center in a slum with together Colombo City Hall, In particular, the Sammitpure area where our center is located is a poor area due to poverty and drugs. At first, we repaired and used an old building provided by the city of Colombo with KOICA (Korea International Cooperation Agency) support, signed an MOU with City Hall and renewed the contract every 5 years, and have been educating children until now. Kindergarten in the morning and after-school classes in the afternoon help students adapt to school well, and special activities include computer, Korean, and music. And a second center opened in 2017 in the Dicowitta area, 30 minutes away from here, and is running after-school classes. Sri Lanka schools do not have computer facilities properly, so many children want to take classes in the computer classroom operated by our center. However, we are in the middle of a pity that our computer is also broken, so we can't have a smooth class.

Below is the number and content of students currently receiving computer classes.

Due to the poor environment, we are still working on the basics.

Division	Grade	Student	Number	Use	Teacher	content
1 centre	6thG up	186	20	10 years	Three	keyboard, word,basics
2 centre	6thG up	114	15	10 years	Two	keyboard,wor d,basics

Let me know if you need anythingelse.

Appreciatively,

Youngsun Jun
