Through its technologic resources, student-learners are able to supplement their school curriculums while building literacy skills that support educational advancement. In short, Unlock Eduridges educational gaps, providing resources to underserved communities and providing avenues to create a more robust learning environment. Through Unlock Edu, children are supported in their discovery and master of digital tools. Many rural schools in Ghana are underresourced and lack adequate facilities. They also lack teaching staff and learning materials. Consequently, the well-staffed and resource rich Unloc Edu library center is an invaluable partner to local schools and families.

The library employs permanent staff and benefits from international volunteers who monitor and evaluate student progress. These core partners assist student-learners with meeting the contribution of the con
the curriculum standards at their local schools and advancing the higher educational goals. Unlock Edu is the flagship educational project of the West Africa Volunteer Project of Humanity (WAVPH). WAVPH seeks to create vibrant local communities with appropriate development initiative to achieve access to quality education, empower women and children, promote agricultural development, advance human right and achieve quality health in underserved communities in the Walfrican Sub-Region.
Through WAVPH, volunteers mentor student-learners in a hybrid system which allows for participation not only from the voluntee home countries, but also in-person, at the center itself. Their participation and the educational attainment which results aids in the transformation of lives and communities.
