

1. THE USE (PURPOSE) OF LAPTOPS TO VULNERABLE CHILDREN:

These laptops will be used to teach children on how to utilize computers in the 21st century. they will serve a vital role as leaning will become more practical than theoretical as before. More so, the knowledge on internet surfing and research will be realistic to these vulnerable children. Couple with the fact that these children are vulnerable and less privileged from poor family background. Some of these kids live with HIV and some of them have parents who equally live with the virus. For over twenty years, we (**ACTWID**) have been dealing with the poor and marginalized children and adults in a club called “**the chosen children`s club**” for **HIV** and related diseases.

2. This project is located at ACTWID vocational training center ATUAZIRE 1 MANKON BAMENDA CAMEROON c/o P.O. BOX 16 MANKON.

3. The language to be used will be purely ENGLISH

4. On site Contact info:

- ❖ Name: **Bernadette Losha Wendi**
- ❖ Phone: **(+237) 677333500**
- ❖ Email: yaahwendi2001@yahoo.com
- ❖ Physical address (**ATUAZIRE 1 MANKON BAMENDA CAMEROON, 237**):
- ❖ GPS coordinates: **Can be found in Google. Our internet connection is poor at the moment and can't do the search**

5. CLAIMED IT EQUIPMENT

- ❖ Number of laptops needed: **50 pcs**
- ❖ Number of ebook reader needed: **25 pcs**
- ❖ others needed: **15 TABLETS, 25PCs**

6. Number of students: a total of 50+ students (children). Adult rural women leaders/youths randomly selected from all over the seven divisions of the North West region could also be trained in this center

7. number of teachers: a total of 3 teachers and some volunteers

8. electricity in the room (220v and plug socket type C)

9. Does the room have access to internet? **yes**
- ❖ Is the internet wireless or cable? **Wireless, though expensive**
10. Conditions about the room where the laptops will be installed:
- ❖ Is the room secured? **Yes: the room has three access points; with the main door being metallic while the other two are strong wooden doors. The windows are heavily protected by iron protectors.**
 - ❖ Can the room be locked in a way that the supervisor or teacher can control access? **Yes; there is only one main access point (main door) into the room which makes it easier for the teachers to control all access into and out of the room.**
 - ❖ Is the room weather-proof? **Yes; the room is zinced and the roof tops are well covered with plywood and the windows are fixed with visible glasses.**
