1. Project Summary: (Please provide a brief statement about the purpose that the laptops will serve in your project site.)

Kaparphori Lower Secondary school is established on 2061 AD with the theme education for all. The school is supported by the government. Most of the children are from poor and marginalized community. Our school is doing well but lacks modern equipment to support our quality education theme. Quality and availability of learning resources strongly affects what teachers can do and many classrooms are bare, with little or no resources to use as learning aids. Often, classrooms have only a board and occasionally some posters. Children have core curriculum textbooks and are usually expected to provide their own note pads and pencils. Those who forget notebooks or pencils may be

left with nothing to do during a lesson because schools often do not have spares. Addressing this lack of materials requires time and creativity. Teachers often lack confidence or ideas in developing and using their own resources. Public resources available for education are limited and often schools do not have extra budgets to be able to purchase sufficient learning resources. Support of this equipment s will help the teachers to gain knowledge and skills from global level. These learning's will be reflected in their teaching ultimately benefits the students. In return this effort will create an environment for a quality education for the children's and opportunity for the teachers to transfer the knowledge and skills.
