

REQUEST FOR ASSISTANCE WITH LAPTOPS FOR OUR COMPUTER LABORATORY

SCHOOL BACKGROUND

Mushili Secondary School is a co-education boarding school situated along Ndola-Kabwe road, about 70Km from Ndola town off Kawama road junction at 5km from the main road. It is a school on the Copperbelt province of Zambia located in Chief Mushili's chieftdom in Masaiti District.

Mushili Secondary School was initially called Mahatma Gandhi Secondary School, named in memory of the former Indian Missionary. The School was opened in 1984, as an off shoot of the already existing school of Chilese Primary School. Initially these were dormitories for

Chilese Primary School pupils who were doing weekly boarding in 1945. After seeing the need for a secondary school, the local community through senior chief Mushili decided to renovate the dormitories into classes. At first it was just catering for local pupils from grades 8 and 9 later it went up to grade 12. The school is currently being headed by Mrs Kabwe Charity Makungu who came to the institution in 2021.

The school operates both as a day and boarding secondary school. It enrolls learners from nearby villages as day-scholars and learners from around the country as boarders.

Girls' Dormitories

Boy's Dormitories

CLASSROOMS

The school has 8 classrooms and four laboratories.

Classroom blocks (Front and back view)

ENROLMENTS

The total number of learners is **270**, of which **120** are boys and **150** are girls.

The table below shows the population of learners by grade and gender:

GRADE	BOYS	GIRLS	TOTAL
8	15	26	41
9	09	23	32
10	38	43	81
11	41	42	83
12	17	16	33
TOTAL	120	150	270

MEMBERS OF STAFF

The school has 26 subject teachers and 4 auxiliary staff. Amongst these only two are trained ICT teachers against a population of 73 learners that need computer lessons, which is a big challenge.

Some members of staff (Staff Room)

COMPUTER LAB

The school has no computer laboratory but has turned one Science laboratory into a computer laboratory. If possible, we would like a computer laboratory constructed.

There are no available computers at the school for the learners hence making the teaching of ICT very difficult. Therefore, teachers teach more theory than practical; and as such, we are requesting to be for assisted as many computers as possible.
