1. Project Description: (Please explain here your project and how you will use the laptops.)

Mangil's Library project provided dootronics to the first and only higher secondary school in the project initiator's hometown/village. The students of this school were hardly exposed to computer and online resources, and most of them would not know how to operate a computer. Likewise, this project, Extension of Mangil's Library Project, aims to provide dootronics to Presbyterian English School, the middle school (Nursery to Class-VIII) at Tanhril in the outskirt of Aizawl, the capital city of Mizoram state in India. This school does not have access to the internet, and the only educational resource the school has is the course textbooks, which contributes almost none to increase their critical thinking skills and to help them find their goals and passion. Therefore, having the excellent electronic resource which can be provided by the Labdoo besides their present fixed course textbooks will show the students a path of self-realization of how they can become one person that brings positive changes to his/her society and the world.
