

REQUEST FOR ASSISTANCE WITH LAPTOPS FOR OUR NEW COMPUTER LABORATORY

SCHOOL BACK GROUND

Nkambo Secondary school was founded in the year 2023. It is a school in the Copperbelt province of Zambia and located in Chief Nkambo's chieftom in Masaiti district along Ndola-Kabwe road, off Silangwa-Mkushi Road junction at 25 metres from the main road.

The school started operating in 2021 as a secondary section for Matipa Primary school. However, with the introduction of free education from Early Childhood Education to grade 12, the need for school places rose drastically. School management therefore, made arrangements with the former Kemuz Education Institute owner if they can use the premises. As of January

this year (2023), the school started operating at its current location using the structures for former Kemuz Education Institute now as Nkambo Secondary School.

Administration Block

Additionally, Nkambo Secondary School operates both as a day and boarding secondary school. It accommodates learners from most surrounding areas because the other schools nearby are many kilometres away from the main road hence the increase in population of learners in the few months of operation at the new location. The first and current Headteacher is Mr Walubita Masiliso the former Deputy Headteacher for Matipa primary school.

Boys' Dormitories

Girls' Dormitories

CLASSROOMS

The school has 7 classrooms and 2 Science laboratories. It runs from grade 8 to grade 12.

Classroom Blocks

ENROLMENTS

The total number of learners is **855**, of which **469** are girls and **386** are boys.

The table below shows the population of learners by grade and gender:

GRADE	BOYS	GIRLS	TOTAL
8	78	97	175
9	89	98	187
10	101	121	222
11	83	98	181
12	35	55	85
TOTAL	386	469	855

MEMBERS OF STAFF

The school has 23 subject teachers and 2 auxiliary staff. Amongst these only three are trained ICT teachers against a population of 606 learners that need computer lessons, which is a big challenge.

Some members of staff (staff room)

COMPUTER LAB

The school has no computer laboratory but has turned one Science Laboratory into a computer laboratory.

There are only 2 computers hence making the teaching of ICT very difficult. Therefore, teachers teach more theory than practical. Hence, we are requesting to be assisted with as many computers as possible.
