Condition about the room where the laptops will be installed:

Is the room secure? (yes/no + brief explanation

Yes, our hub is secure enough in that it is only accessed by the students in the presence of trainers.

Can the room be locked in the way that supervisors (eg teacher) can control access? (Yes/no + brief explanation)

Yes, our hub is only accessed by the trainers and space technicians whereby it's only opened when during running activities with youths. This has enhanced the proper usage of the resources since the youth are being guided on how to handle them responsibly.

Is the room weather proof?(e.g. does the room protect the laptop from rain, sand, etc.?) (Yes/no + brief explanation)

Yes, the training space is conducive and having a ceiling roof, installed with electricity and a well plastered concrete floor and ever green cover with does not support the dusty conditions.
